

2020 World Tsunami Awareness Day

Pacific Island Countries Regional Webinar

4 November 2020
01.00-03.00 UTC

This webinar session provides an opportunity to better understand the achievements, challenges and opportunities of tsunami warning and mitigation system for Pacific Island Countries (PIC) and identify areas of collaboration and engagement for an effective and efficient tsunami warning and mitigation system. The panel will discuss lessons learnt from tsunami events in the Southwest Pacific that shaped current tsunami early warning and mitigation system and from national and regional initiatives that continues to strengthen tsunami early warning and mitigation system.

AGENDA

Part 1

- Lessons learnt from 2009 Samoa Tsunami
- Lessons learnt from 2007 Western Province Tsunami

Part 2

- The Oceania Regional Seismic Network (ORSNET) Journey
- Local Sources Tsunami SOP & NTCW Competency Framework
- Regional Perspective of PIC Tsunami Warning and Mitigation System
- Managing tsunami risk in an era of COVID-19

Moderator: **Filomena Nelson**, Climate Change Adaptation Advisor at the Secretariat of the Regional Environment Programme (SPREP)
