Tsunamis can be detected using our human senses. Recognize a tsunami’s natural warning signs.

**FEEL**
- Big local earthquakes may cause tsunamis.
- FEEL the ground shaking severely, or for a long time?

**SEE**
- Tsunami may be preceded by rapid fall in sea level as the ocean recedes, exposing reefs, rocks, and fishes on the sea bottom.
- Tsunami often come ashore as a wall of water, and quickly flood inland.
- SEE an unusual disappearance of water, or oncoming wall of water?

**HEAR**
- Abnormal ocean activity, a wall of water, and approaching tsunami create a loud “roaring” sound similar to that of a train or jet aircraft.
- HEAR the roar?

**RUN**
- Don’t wait for official evacuation orders.
- Immediately leave low-lying coastal areas.
- Move inland to higher ground.
- RUN if you see a tsunami coming!
