OBJECTIVES OF THE NATIONAL TSUNAMI WARNING SYSTEM (SINAT)

I. Monitor and alert on the occurrence of tsunamis generated anywhere in the world that could affect the country.

II. Generate information and knowledge to determine the level of risk along the coastline in the country.

III. Foster a culture of self-protection for the public regarding the measures to be taken upon the occurrence of a tsunami.

IV. Provide permanent training to state and municipal civil protection units on the actions to be applied to face an emergency resulting from the impact of a tsunami in our country.

PURPOSE OF THE TSUNAMI WARNING CENTER (CAT)
Operate 24 hours, 365 days a year to concentrate and disseminate timely information on distant, regional and local tsunamis, affecting the coasts of the country. This permanent operation would lead to saving lives and to reducing the loss of life and property.
